CLASS TITLE | CLASS CODE | SALARY GROUP | SALARY RANGE
--- | --- | --- | ---
PROGRAMMER I | 0241 | B19 | $42,244 - $68,960
PROGRAMMER II | 0242 | B21 | $48,278 - $78,953
PROGRAMMER III | 0243 | B23 | **$55,184 - $90,393**
PROGRAMMER IV | 0244 | B25 | $63,104 - $103,491
PROGRAMMER V | 0245 | B27 | $76,356 - $129,137
PROGRAMMER VI | 0246 | B28 | $83,991 - $142,052

GENERAL DESCRIPTION

Performs highly complex (senior-level) computer programming work. Work involves carrying out and/or coordinating programming projects, analyzing proposed applications, and designing software solutions. May supervise the work of others. Works under limited supervision, with considerable latitude for the use of initiative and independent judgment.

EXAMPLES OF WORK PERFORMED

Coordinates and/or performs work on programming projects including those that are highly complex in nature and/or large in scale.

Coordinates and/or writes test plans and test data.

Coordinates and/or develops diagrams and flowcharts to represent operations and data flow for applications.

Coordinates and/or performs the research and the analysis required for project proposals, software and systems modifications, and new projects.

Writes complex software code and debugs software.

Develops instructions or manuals for end users.

Analyzes proposed applications for equipment requirements and capabilities.

Analyzes, reviews, and revises software to increase operating efficiency or to adapt new procedures.

Prepares detailed analyses, plans, diagrams, and verification procedures for existing and proposed applications.

Provides technical advice and assistance in matters related to programming activities.

May supervise the work of others.

Performs related work as assigned.
GENERAL QUALIFICATION GUIDELINES

EXPERIENCE AND EDUCATION

Experience in computer programming work. Graduation from an accredited four-year college or university with major coursework in data processing, computer science, business administration, or a related field is generally preferred. Experience and education may be substituted for one another.

KNOWLEDGE, SKILLS, AND ABILITIES

Knowledge of the principles, practices, and techniques of computer programming and systems analysis; of computer operations procedures and systems; and of computer programming languages.

Skill in problem solving, in critical thinking, in computer programming, in the use of hardware and software, and in modifying or developing software for applications.

Ability to process information logically; to design programs and systems logic; to prepare program specifications; to code, test, and debug software; to interpret technical information related to programming and other areas of data processing; to communicate effectively; and to supervise the work of others.
