**GENERAL DESCRIPTION**

Performs entry-level to routine (journey-level) telecommunications work. Work involves installing, operating, diagnosing and resolving voice, data, digital, wireless, and video telecommunications problems. Works under moderate supervision, with limited latitude for the use of initiative and independent judgment.

**EXAMPLES OF WORK PERFORMED**

Installs and repairs voice, data, wireless, and video communications systems to ensure reliable operation.

Confers with contractors and telephone companies used throughout the communication network with regard to proper operation, installation, and maintenance of lines, data phone equipment, and associated terminals.

Maintains records of system performance and operations.

Troubleshoots, conducts preventive maintenance, and performs system diagnostic checks.

Performs system moves and changes internally or via remote access.

May assist in designing, configuring, and implementing network communication products.

May assist in implementing solutions for network communications or remote dial-in access hardware and software.

May assist in establishing and coordinating a preventative maintenance program to ensure proper functioning of telecommunications systems and equipment.

Performs related work as assigned.

**GENERAL QUALIFICATION GUIDELINES**

**EXPERIENCE AND EDUCATION**

Experience with electronics or telecommunications installation and maintenance work.

Graduation from a standard senior high school or equivalent is generally preferred. Education and experience may be substituted for one another.
KNOWLEDGE, SKILLS, AND ABILITIES

Knowledge of data processing and telecommunications principles, equipment, procedures, terminology, standards, and wiring technologies; of network operating systems; and of the Federal Communications Commission’s policies and procedures.

Skill in the use of telecommunications test equipment, of computers and applicable software, and of microcomputer or mainframe applications.

Ability to install, operate, and test telecommunications equipment; to analyze, diagnose, and resolve telecommunications problems; to interpret technical information; and to communicate effectively.
