### General Description

Performs advanced (senior-level) architectural work. Work involves coordinating the planning, design, and execution of architectural and construction projects. May serve as a lead worker providing direction to others. Works under minimal supervision, with considerable latitude for the use of initiative and independent judgment.

### Examples of Work Performed

- Plans and coordinates architectural, design, and construction projects including those of high complexity and large in scope, ensuring that codes, standards, and project requirements are met.
- Prepares design drawings, blueprints, records, and administrative and technical reports.
- Prepares information regarding design, structure specifications, materials, color, equipment, estimated costs, and construction time.
- Determines functional and spatial requirements of new structures or renovations.
- Conducts special studies for architectural or construction projects, reduces facts to specific findings, and recommends solutions.
- Conducts inspections and evaluates data for compliance with laws and specifications.
- Develops and prepares consultant contracts, advises and selects consultants, and negotiates with consultants on fees as assigned.
- Performs data collection, evaluation, analyses, investigations, inspections, forecasts, and assessments associated with facility projects.
- Provides architectural and construction management technical assistance to others.
- Coordinates with contractors, construction managers, inspectors, project managers, and code officials; conducts field observation of work in progress to assure contract compliance.
- May provide public presentations and training regarding various areas of design, including architectural history, public improvements, preservation, urban design, sustainability and building rehabilitation as well as agency or program procedures and methods.
- May serve as a lead worker providing direction to others.
- Performs related work as assigned.
GENERAL QUALIFICATION GUIDELINES

EXPERIENCE AND EDUCATION

Experience in architectural and construction management work. Graduation from an accredited four-year college or university with a degree in architecture, landscape architecture, or related degree in a program accredited by the Landscape Architectural Accreditation Board or National Architectural Accrediting Board.

KNOWLEDGE, SKILLS, AND ABILITIES

Knowledge of architectural and design principles, techniques, and procedures; of construction methods and management; of engineering specifications related to design work; and of mathematical applications.

Skill in the use of architectural tools and in problem solving.

Ability to visualize architectural designs; to apply architectural concepts; to plan, coordinate, and oversee projects; to conduct inspections; to communicate effectively; and to serve as a lead worker providing direction to others.

REGISTRATION, CERTIFICATION, OR LICENSURE

Must be registered as an Architect or Landscape Architect by the Texas Board of Architectural Examiners.
