**GENERAL DESCRIPTION**

Performs highly advanced (senior-level) natural resources work. Work involves overseeing and/or performing conservation, management, protection, preservation, or utilization of natural resources work. May supervise the work of others. Works under minimal supervision, with extensive latitude for the use of initiative and independent judgment.

**EXAMPLES OF WORK PERFORMED**

- Oversees and/or performs data collection, research, analysis, evaluations, inspections, or surveys; and evaluates impact on natural resources.
- Oversees and/or performs the activities of a natural resources program, and develops methods for improved management and technical techniques.
- Oversees the processing and review of applications for permits and licensing.
- Oversees inspections, surveys, assessments, and studies; evaluates results with regard to their impact on the state’s natural resources; reviews recommendations regarding findings; and coordinates follow-up inspections as required.
- Conducts public hearings, facilitates group discussions, and provides technical assistance and advice to management, the public, or other interested groups in the application of appropriate state and federal laws and regulations and natural resources programs and plans.
- Develops and evaluates environmental and administrative policies and procedures.
- Designs and evaluates complex simulation models, validates data, and develops reports and technical summaries on the results.
- Evaluates statistical and natural resources data, interprets the results, and prepares technical reports of findings.
- Evaluates environmental, ecological, meteorological, or pollution-control assessments.
- Formulates state- or area-wide environmental safety or health plans or natural resources programs.
- Reviews, approves, and monitors interagency and consultant contracts.
May prepare plans and specifications for the development, operation, and maintenance of wildlife management areas.

May supervise the work of others.

Performs related work as assigned.

GENERAL QUALIFICATION GUIDELINES

EXPERIENCE AND EDUCATION

Experience in environmental quality, natural resources, botany, and agronomy work. Graduation from an accredited four-year college or university with major coursework in natural science or a related field is generally preferred. Experience and education may be substituted for one another.

KNOWLEDGE, SKILLS, AND ABILITIES

Knowledge of applicable local, state, and federal ordinances and laws; of environmental or chemical engineering; of chemical and biological analysis techniques and procedures; of radiological safety practices and techniques; of botany, ecology, taxonomy, and hydrology; and of the operation of municipal, agricultural, and industrial water treatment plants.

Skill in the operation and maintenance of laboratory and environmental equipment and in the use of a computer and applicable software.

Ability to conduct inspections, surveys, investigative research, and studies; to analyze environmental samples; to prepare reports; to provide expert testimony; to communicate effectively; and to supervise the work of others.
